

Instrument title	Condenser-type cooling device testing chamber
Photo	
Technical details	<p>Capacity of useful space is 8000 liters; dimensions of useful space are 2300 mm length, 2200 mm width, and 1870 mm height; temperature range is -70 – +300°C; temperature constancy is - ±5°C; pressure range is $190 - 10^5$ Pa; pressure constancy is ±130 Pa; humidity range is 10-95% within temperature range of +10-+60°C; humidity constancy is ±3°C.</p>
Application	<p>Testing of large-size specimens and their combinations, building elements, devices, machines and facilities under particular climatic surrounding conditions.</p>
